

Heckler & Koch (H&K) Germany came out with a new "High-Reliability 30-Round Steel Magazine" for use with AR-15 / M-16 / M-4 / SA-80 type rifles. See picture below.

Our standard M-16 **LULA™** loader & unloader fits and works well with this new magazine.

Setback:

However, since this magazine catch (female) is not a through-hole as in regular NATO USGI M16 mags., for which the **LULA™** loader was originally designed, the **LULA™** loader may slip away prematurely from the magazine. This may start happening after loading / unloading several hundred magazines.

Solution:

Either use the M-16 **LULA™** knowing its limits, or use the latest M-16 / AR-15 M-16 **StripLULA™** which will load this magazine perfectly for a long time.

The new H&K "High-Reliability 30-Round Steel Magazine"
